The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 15 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3 and 26 as presented in the instant claims are independent claims. The claims are related to a lead free soldering material consisting essentially of tin. In these claims, there is no mention of a lead free soldering material consisting essentially of tin. Appropriate corrections are required.

## Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 3, 7-9, 15, 19 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Achari et al (5863493) in view of Chen et al (5538686).

Achari teaches a lead free solder composition comprising 91.5-96.5% tin, 2-5% silver, .1-3% nickel and 0-2.9% copper.

Although Achari teaches a lead free solder composition, Achari does not teach a lead free composition comprising bismuth or antimony.

Chen, col. 2 lines 19-26, teaches an article comprising a lead free solder comprising Bi and/or Sb, with the range of the former being 0-10 (preferably at most 5) weight %, and the range of the latter being 0-5 (preferably at most 3) weight %.

It would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate Bi and Sb in the amount as taught by Chen into the composition as taught by Achari because Chen teaches the addition of Bi and/or Sb can result in a refined alloy microstructure and reduced tendency for the formation of undesirable lower melting temperature phases.

Regarding claims 3, 7 and 15, Chen, col. 2 lines 19-26, teaches an article comprising a lead free solder comprising Bi and/or Sb, with the range of the former being 0-10 (preferably at most 5) weight %, and the range of the latter being 0-5 (preferably at most 3) weight %.

Regarding claim 8, Achari teaches a lead free solder composition comprising .1-3% nickel.

## Response to Arguments

Applicant's arguments with respect to claims 1, 3, 7-9, 15 and 18-25 have been considered but are most in view of the new ground(s) of rejection.

Application/Control Number: 10/554,274

Art Unit: 1793

Any inquiry concerning this communication or earlier communications from the examiner should be directed to STEFANIE COHEN whose telephone number is (571)270-5836. The examiner can normally be reached on Monday through Thursday 9:3am-6:00pm.
